

# Love in Action

THE MONTHLY NEWSLETTER OF THE REHOBOTH CSR

MAY 2025 | ISSUE 3

## OUR CHILDREN, OUR FUTURE!

**June 1**, is International Children's Day - Hurraaaaay!

Birtherd exactly a century ago, the day is now observed in over 50 countries globally (with the rest marking it on November 20). It is a day set aside to celebrate children, and advocate for their rights and well-being. International Children's Day serves as a reminder of our collective responsibility to provide every child with their most basic needs - access to education, healthcare, safety, and opportunities to grow in a nurturing environment.

The theme for the 2025 celebration is **"For every child, every right."** To us, this is an invitation to reflect on how we treat children and a call to action to ensure that every child is protected from harm, loved, and respected.

Children are at the heart of everything we do at Rehoboth Charity. Through our Endless Smiles initiative, we are leading efforts to empower children through programs that promote education, recreation, and personal development.

As we observe this year's International Children's Day, we bring to you, 9 grim statistics that highlight the realities of children in our world today. This is why our mission matters more than ever.

**30%**

Global population are classified as children. About **2.6 Billion**

**333**

**Million**  
Children living in Extreme Poverty globally.
